

CHAPTER V

CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusion

Based on the results of research and discussion at SMP Citra Negara, this system can be concluded that:

1. By using a computerized system, e-report assessments can be accessed online properly and quickly at Citra Negara Middle School.
2. Whereas the e-report assessment information system can minimize the occurrence of errors in the manipulation of value data on students at Citra Negara Middle School .
3. Using an information system can produce or provide a sense of justice for SMP Citra Negara students.

5.2 Suggestions

Based on the various limitations that the author has both in terms of time and essay, the authors suggest for the development of future research as follows:

1. It is necessary to add other features in the form of periodic automatic data backups, so that data is maintained and safe.
2. This research is an example of the analysis and design of student e-report information systems at Citra Negara Middle School, so that if it is to be used by other institutions or organizations, adjustments are needed according to the needs of the institution or organization concerned.
